

Comparing the USA and UK

Where in the World?

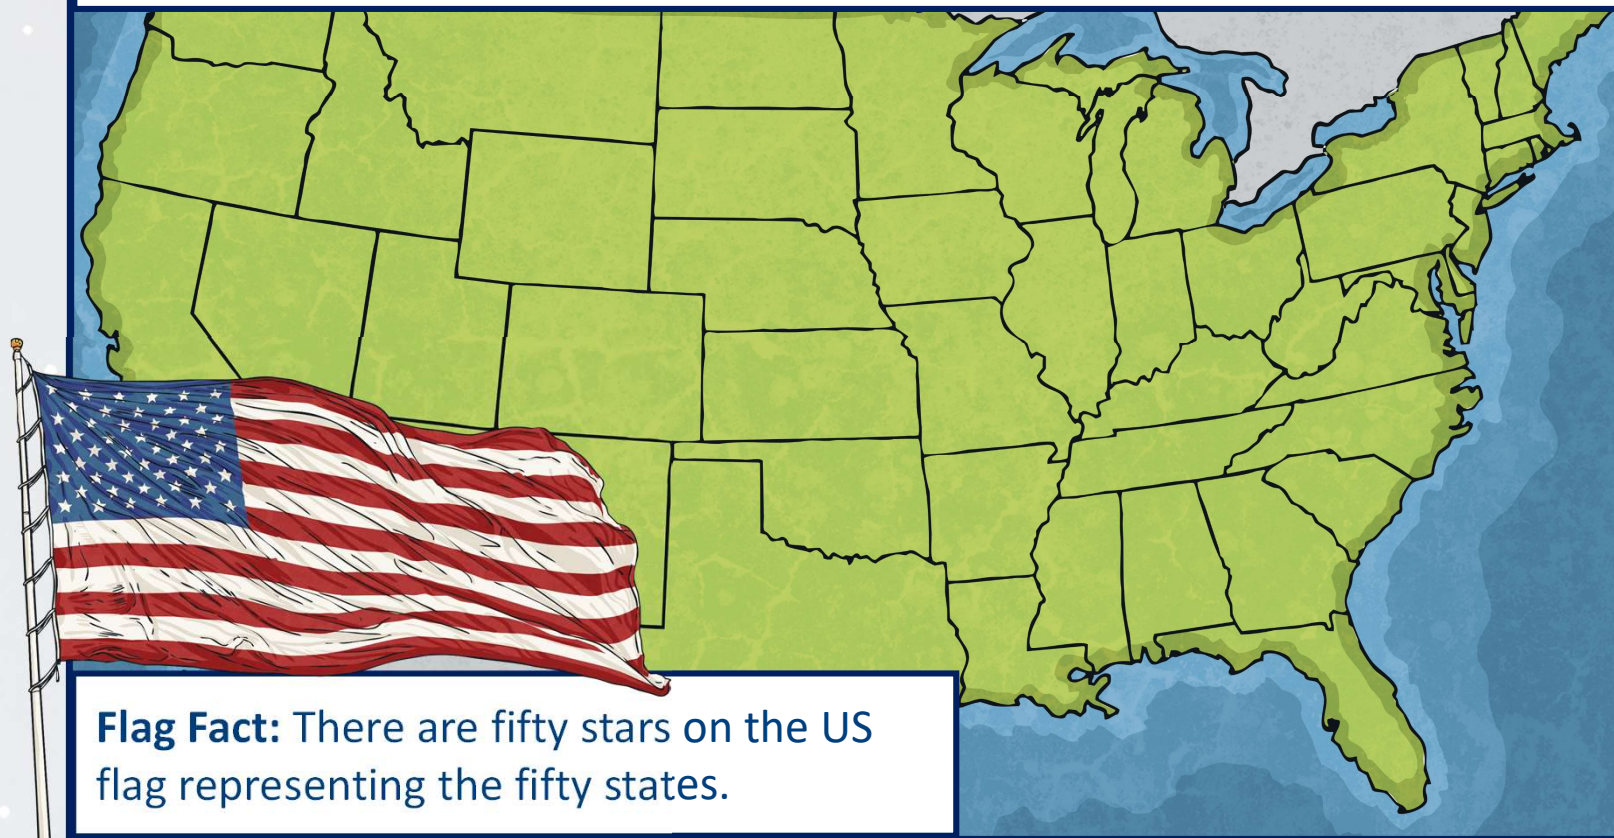

The United Kingdom
is made up of England,
Scotland, Wales and Northern
Ireland. It is in the Atlantic
Ocean.

The United States of America is
across the Atlantic Ocean from the
UK, in North America in-between
Canada to the north and Mexico
to the south.

The United States

It is called the United States of America because the country is split into fifty different states (a bit like the counties we have in England).

Flag Fact: There are fifty stars on the US flag representing the fifty states.

The United States

Each state has an abbreviation, such as TX for Texas (a bit like UK postcodes). Why not have a go at identifying them all?

Hawaii (HI) is over 2500 miles west of California and about the same distance south of Alaska!
